

PRODUCT PORTFOLIO:

Original products based on the own R&D or produced in cooperation with the leading national and foreign companies

VACCINES

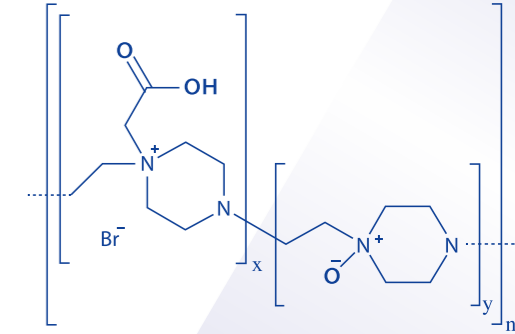

- **Grippol® Plus**
Russia's first inactivated flu vaccine free from preservatives; applied in National Immunization Programme for children since 2009, and for pregnant women since 2014.
- **Grippol®**
Flu vaccine of the National Immunization Programme since 2006; vaccine used for mass influenza immunoprophylaxis for more than 20 years.
- **Prevenar® 13**
Innovative vaccine to prevent pneumococcal infections caused by Streptococcus pneumoniae bacteria, serotypes 1,3,4,5,6A, 6B, 7F,9V, 14, 18C, 19A,19F, 23F (infections include sepsis, bacteremia, meningitis, pneumonia, and acute otitis media).

PHARMACEUTICAL MEDICINES

- **Longidaze®**
High-end enzyme-based long-acting product for complex therapy of diseases accompanied with connective tissue hyperplasia (commissures, scars, and fibrosis processes).
- **Polyoxidonium®**
Efficient and safe pharmaceutical product acting as an immunomodulator, detoxicant, and antioxidant. Polyoxidonium® is indicated for treating acute and chronic infectious diseases of bacterial, viral or fungal origin. The product is widely used in surgery, therapy, urology, gynaecology, and paediatrics.

VETERINARY

- **Azoxivet®**
Immunomodulator for immunity correction in domestic small animals and for complex therapy of acute and chronic diseases.
- **Vetolaza®**
Product for complex therapy of acute and chronic endometritis, as well as for stimulation of cattle fertilization.

BEAUTY PRODUCTS

- **Imoferaza®**
Innovative remedy to treat external scars by targeting directly the cause of the scars formation. It is applied for specialized care of skin problem zones and deformed areas resulting from scars after cosmetic treatments, traumas, burns, acne eruptions (post-acne marks), and surgeries.

NPO Petrovax Pharm is the leading Russian R&D and manufacturing company of innovative pharmaceutical products and vaccines.

The company was established in 1996 by Professor A. V. Nekrasov and a group of Russian scientists specializing in chemistry, biology, and biotechnology.

- Strong and promising portfolio of immunobiological original products and molecules based on fundamental R&D.
- More than 20 global patents for molecules and pharmaceutical products.
- Only original products, which are applied in some of the most important areas such as infection diseases, vaccinations, immunology, urology, gynecology, and reproductive health.
- 20 years of experience in practical healthcare. Official distributor of vaccines for the National Immunization Programme.
- 650 highly qualified employees, including those with academic degrees from philosophy doctors to academicians (members) of the Russian Academy of Sciences.
- High tech pharmaceutical manufacturing site in accordance with the Russian and international GMP standards.
- Strategic partner projects in cooperation with global pharma leaders, Pfizer and Abbott.
- Export of the products to CIS, EU countries and Iran.
- First localization of original Russian vaccines outside the country – in Belarus.
